ARB ACCESSORIES FOR LATEST MODEL TOYOTA LANDCRUISER 200 SERIES

October 2012

The iconic Toyota LandCruiser has long been an off road favourite for tourers and adventurers alike. In line with some recent enhancements to the vehicle, ARB has redesigned a number of its accessories to suit the latest LandCruiser 200.

Available now, ARB's accessory range for the vehicle includes deluxe and commercial bull bars, side rails and steps, rear bars, Air Lockers, Old Man Emu suspension systems, Outback Solutions drawers, and Safari snorkels.

Incorporating the same core features as the previous model 200 Series deluxe bull bar, including ARB's proven split pan design for increased airflow, and multi-fold, upswept wings for an optimised approach angle, the deluxe bar for the latest model 200 Series has been updated to complement the new head lamp and grille design, as well as accommodating parking sensors, where fitted. Air bag compatible, the deluxe bar is available for both non winch and winch applications, with the latter accommodating up to a 12,000lb model Warn winch. Finished in a durable powder coat with the option to colour code, the 200 Series bar comes complete with injection moulded housings to accommodate indicators, parking lights and optional fog lights. Further increasing functionality, the bar comes standard with twin Hi-Lift jacking points and provision for IPF lights and CB aerials. Foregoing some of the aesthetic characteristics of the deluxe version, a commercial bar is also available for the latest 200 Series and offers the same level of functionality and strength at a lower cost.

Offering side vehicle protection for front guards, headlight assemblies and lower sills, as well as providing easy access to the vehicle, ARB side rails and steps are also now available for the LandCruiser. Manufactured from steel, the rails and steps do not interfere with the operation of side air bags and connect with the ARB bull bar for a complete front guard protection system for the vehicle.

Increasing protection and functionality to the rear of the vehicle, an ARB rear bar facilitates the fitment of jerry can holders, spare wheel carriers and other accessories on the back of the vehicle. The swing out style carrier operates by applying slight pressure to a lever and closes with a simple slam shut.

ARB manufactures and distributes a range of additional products suited to the LandCruiser 200 Series, including roof racks, Outback Solutions drawer systems, Safari snorkels, ARB Fridge Freezers, recovery equipment and general accessories.

200 Series owners can also enjoy the benefits of an Old Man Emu suspension system. Specifically tailored to the individual needs of the driver and taking into consideration how the vehicle will be used, OME engineers match shock absorbers to springs for noticeable improvements in ride, excellent off road traction and full load carrying capability.

Front and rear Air Lockers are also available for the 200 Series, providing vastly improved traction across severe terrain. Ideal for difficult off road conditions and changing weather, ARB Air Lockers are activated by the flick of a switch and make it possible to traverse steep, unpredictable terrain in a controlled manner, reducing the likelihood of vehicle damage and environmental impact.

ARB manufactures and distributes a range of additional products suited to the LandCruiser 200 Series, including roof racks, Outback Solutions drawer systems, Safari snorkels, ARB Fridge Freezers, recovery equipment and general accessories. Sold exclusively by ARB stores and authorised distributors, ARB's Toyota LandCruiser 200 Series accessories range is available now.
